

Possibilities of Intervention against Spiritual Abuse

SYMPOSIUM

17/09/2024 – 20/09/2024

Ludwigshafen/Germany
Heinrich Pesch Haus

Spiritual abuse has become in recent years increasingly visible as the abuse behind the abuse in the church. While many prevention and intervention measures are available, implemented and evaluated in the area of sexualised violence, there is a lack of proven recommendations for intervention in the case of spiritual abuse.

The symposium aims to update information, to creatively develop intervention options and to give recommendations for Catholic church leaders.

Theologians, psychologists, canonists and lawyers from the European context are invited.
